

GREEN MUJINA

Layout: Stonerbox (diystompboxes)
Ver. 0.99
Unverified!

R1, R11.....	1M
C1.....	2.20pF
C2, C5, C12, C19, C21.....	4.7uF
C3.....	50pF
C4.....	10pF
C6, C11, C13, C14, C18, C20, C22, C24.....	6.8uF
C7, C9.....	680pF
C8, C23.....	1nF
C10.....	2.2nF
C15.....	4.7nF
C16.....	1uF
C17.....	4.70pF
Q1, Q2, Q3, Q4.....	J201
Q5.....	J113
R2.....	68K
R3, R6, R12, R22, R26.....	2K
R4.....	820K
R21.....	15K
R7.....	56K
R8, R19.....	2.2K
R9, R10, R15, R24.....	100K
R13.....	2.2K
R14, R18.....	4.7K
R16, R17, R23.....	5.6K
R20, R28.....	200K
R5, R25, R27.....	1K
Rotary Cap 1.....	1uF
Rotary Cap 2.....	1nF
Rotary Cap 3.....	680pF
Rotary Cap 4.....	4.70pF
Rotary Cap 5.....	150pF
Rotary Cap 6.....	100pF
Rotary Cap 7.....	50pF
OPA2135, OPA2135.....	2
Pot: Bass 1M Linear.....	1
Pot: Grain - Dual Gang Pot 10K Log.....	1
Pot: Master Volume 500K log.....	1
Pot: Treble 1M Log.....	1
Pot: Volume 1 50K log.....	1
Pot: Volume 2 100K log.....	1
Rotary switch - 1PT12.....	1
Toggle Switch - Pre or Pre+Power Stage 3PDT.....	1
Trim 1, Trim 2, Trim 3, Trim 4, Trim 5.....	100K
VDR1, VDR2.....	3K
VDC.....	4.7uF

Trace cuts: 52

Pay close attention around
OPAMPS and Trimpots

Components with the prefix **VD** forms a Voltage Divider.

Adjust trimpots so the drains of all JFETS are
supplied with 1/2 VCC

If the circuit starts oscillating try lowering R15.
